Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-18, drawn to a method and apparatus for color quantization of an image, classified in class 382, subclass 166.
 - II. Claims 19-38, drawn to a method and apparatus for generating a dynamic color map, classified in class 382, subclass 162.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the invention of Group I does not require specific details of the claimed method and apparatus for generating a dynamic color map of the invention of Group II. The subcombination has separate utility such as color image segmentation.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. During a telephone conversation with Mr. Okumoto on 3/7/05 a provisional election was made without traverse to prosecute the invention of Group I, claims 1-18. Affirmation of this election must be made by applicant in replying to this Office action. Claims 19-38 are

Art Unit: 2621

withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

5. This application is in condition for allowance except for the presence of claims 19-38 to an invention non-elected without traverse. Accordingly, claims 19-38 have been cancelled.

EXAMINER'S AMENDMENT

6. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Cancel claims 19-38.

7. The following is an examiner's statement of reasons for allowance: None of the prior art whether taken singly or in combination teaches the claim limitation of "if individual of said corresponding color space regions are not linked to said color map, then linking said individual of said corresponding color space regions to said color map where color map linkages are available, or determining color space regions that are linked to said color map and having associated colors closest to colors of the pixels of said individual of said corresponding color space regions where color map linkages are not available." Such unique claim limitation, in combination with other claim limitations, renders the claims allowable.

Art Unit: 2621

Wittenstein et al, Barteel et al, and White et al are cited for disclosing various color image processing method and apparatus. These references fail to disclose the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phuoc Tran whose telephone number is (703) 305-4861. The examiner can normally be reached on MON-FRI.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Bhavesh Mehta can be reached on (703) 308-5246. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
